ALEXANDER C. JENKINS

Kavli Institute for Cosmology and DAMTP | University of Cambridge | Cambridge, UK
acj46@cam.ac.uk | Website | Publications | GitHub | LinkedIn

ABOUT ME

I'm a theoretical physicist, working at the interface between *cosmology*, *high-energy physics*, and *quantum matter*. My research looks at new ways of probing the fundamental laws of Nature, whether that's using *gravitational waves* as cosmic messengers, or using *quantum technologies* to simulate the early Universe.

EMPLOYMENT

Gavin Boyle Fellow in Cosmology — *University of Cambridge* *2024–present*
EPSRC Stephen Hawking Fellow *2025–present*
Research fellow hosted in the Kavli Institute for Cosmology Cambridge (KICC) and the Department of Applied Mathematics and Theoretical Physics (DAMTP) | Fellow of Selwyn College

Postdoctoral Research Fellow — *University College London* *2021–2024*
Led an international, interdisciplinary project to study vacuum decay with quantum analogue experiments and lattice simulations, as part of the QSimFP Consortium | Member of the Cosmoparticle Initiative

EDUCATION

PhD in Theoretical Physics — *King's College London* *2017–2021*
Funded by competitive faculty scholarship | Theoretical Particle Physics and Cosmology Group
'Cosmology and fundamental physics in the era of GW astronomy', supervised by Mairi Sakellariadou

MSci in Astrophysics (Part III) — *University of Cambridge* *2016–2017*
1st class | Ranked 5th in cohort | Elected a Bateman Scholar of Trinity Hall

Leonid Grishchuk Internship Programme — *Cardiff University* *Summer 2016*
Funded summer research internship in the Gravitational Physics Group

MA in Natural Sciences (Astrophysics) — *University of Cambridge* *2013–2016*
1st class | Elected a Scholar of Trinity Hall

GRANTS AND FUNDING SECURED (POST-PHD)

- EPSRC Stephen Hawking Fellowship (PI, £506k fEC) *2025*
  3-year research council fellowship supporting 'visionary scientists working in theoretical physics'
  Proposal ranked 2nd out of 26 by EPSRC prioritisation panel
- Gavin Boyle Fellowship, KICC and Selwyn College, Cambridge | 5-year institutional fellowship *2024*
- DiRAC High Performance Computing resource allocation (Co-I, COSMOS Consortium) *2024*
  Awarded 3M CPU core hours to support my research on lattice simulations of vacuum decay
- UKRI Quantum Technologies for Fundamental Physics Grant extension (Co-I, £69k) *2023*
  Wrote successful proposal for 6-month funded extension to my QSimFP research
- UCL Astro Group Small Grant | Secured first dedicated funding for seminar series (£1k) *2022*

AWARDS AND ACHIEVEMENTS

- Winner, Buchalter Cosmology Prize (2nd Prize) | UCL press release *2023*
  International award recognising *'ground-breaking theoretical, observational, or experimental work in cosmology that has the potential to produce a breakthrough advance in our understanding'*

- Honorable Mention, GWIC-Braccini Thesis Prize | nominated for three further thesis prizes *2022*
- Best Student Talk Prize at BritGrav 21, sponsored by IoP Publishing *2021*
  Corresponding paper published in *Classical and Quantum Gravity* as an invited submission
- King's Education Award for 'extraordinary contributions' to teaching *2020*
  Also nominated as a 'Rising Star' in 2019 (only PhD student nominee in my department)
- Bateman Scholar of Trinity Hall (Cambridge), recognising 'excellent exam results' *2017*

AFFILIATIONS

Scientific collaborations

∗ GUEST Consortium (*2025–present*) ∗ Quantum Simulators for Fundamental Physics (*2021–present*)
∗ Einstein Telescope Collaboration (*2021–present*) ∗ LISA Consortium (*2018–present*)
∗ LIGO Scientific Collaboration (*2016–2021*)

Professional bodies

∗ Institute of Physics (MInstP; *2018–present*) ∗ Royal Astronomical Society (FRAS; *2020–present*)
∗ Junior Member, European Astronomical Society (*2020–present*)

RESPONSIBILITIES

Leadership roles in scientific collaborations and networks

- Co-lead organiser, *CamGW* — the Cambridge gravitational-wave network *2025–present*
  Initiated an inter-departmental network to connect gravitational-wave researchers across Cambridge; organised a successful programme of meetings with external speakers and 40+ attendees
- Co-organiser, *GW:UK* *2025–present*
  Cambridge representative for the UK's national network of gravitational-wave researchers
- Group lead, *GUEST (Gravitational Universe Exploration with Satellite Tracking)* *2025–present*
  Co-leading a working group to develop the science case for a proposed F-class ESA mission

Organisation of conferences and seminars

- Lead organiser, Kavli Science Focus Meeting on *"Cosmology in the Lab"* *2026*
  Organised a two-day interdisciplinary workshop bringing together theorists and experimentalists working in the area of quantum technologies for fundamental physics
- Co-organiser, *Kavli Astrophysics Symposium* | LOC member for major international conference *2026*
- Co-organiser, Cambridge–LMU Cosmology Meeting *2026*
- Co-organiser, workshop on *'Gravitational Waves and Dark Matter in Orbital Dynamics'* *2025*
  SOC member for workshop in Benasque, Spain | funded by the Gravity Theory Trust ($18k)
- Lead organiser, *UCL Cosmology/Extragalactic Seminars* *2022–2023*
  Developed a programme of in-person talks from what had previously been an online-only event due to COVID-19; secured departmental funding for speaker expenses and group lunches
- Co-organiser, *London Cosmology Discussion Meetings (LCDM)* *2018–2021*
  Coordinated between five institutions to organise meetings at the Royal Astronomical Society
- Lead organiser, *Theoretical Particle Physics and Cosmology (TPPC) Journal Club* *2021*
- Lead organiser, *TPPC Gravity Meetings* *2018–2020*
  Initiated a regular series of meetings with internal and external speakers on gravitational physics

Committees and institutional service

- Workshop Committee, Kavli Institute for Cosmology Cambridge *2026–present*
  Responsible for evaluating and ranking proposals for scientific workshops to be funded by KICC
- Elector, Selwyn College Mastership Election *2024–2025*
  Contributed to interviews and selection process for the new head of my Cambridge college
- Selwyn College Governing Body and IT and Data Committee *2024–present*
- Student representative, KCL Physics Department Research Committee *2019–2021*

Refereeing and review work

- Referee for 8 research grants for the European Research Council, the Royal Society, *2019–present*
  the US National Science Foundation, the UK Engineering and Physical Sciences Research Council, the Polish National Science Centre, and the Czech Science Foundation
- Referee for 32 articles in Physical Review Letters, Nature Astronomy, *2020–present*
  Astrophysical Journal Letters, Physical Review D, Journal of Cosmology and Astroparticle Physics, European Physical Journal C, The Astronomical Journal, and Universe

TEACHING AND SUPERVISION

University of Cambridge *2024–present*

- Delivered three 1hr lectures for 3rd-year *Relativity* (Part II Physics/Astrophysics); student feedback highlighted my 'very clear and engaging lecturing'
- Research project supervisor of two MSci students: Teymour Taj (distinction, went on to MSc Medical Physics at UCL) and Felix Bowden (first class, went on to a PGCE at UCL)
- Delivered small-group 'supervision' teaching for 3rd-year Astrophysicists in *Relativity*, *Statistical Physics*, and *Principles of Quantum Mechanics*

University College London *2021–2024*

- Lead supervisor of two MSc students: Phoebe Routh (distinction, now a PhD student in Glasgow) and David Moody (distinction and awarded departmental prize, now working in data science)
- Teaching assistant for 3rd-year *Physical Cosmology*: developed problem sets, delivered problem-solving tutorials, and contributed to marking of final exams

King's College London *2017–2021*

- Winner of a 2020 King's Education Award, recognising 'extraordinary contributions' to teaching
- 'Rising Star' nominee in the 2019 King's Education Awards (only PhD student nominee in Physics)
- Co-wrote lecture notes for 3rd-year *General Relativity and Cosmology*
- Examples class demonstrator for numerous courses, including 4th-year *Astroparticle Cosmology*, 3rd-year *General Relativity and Cosmology*, 2nd-year *Astrophysics*, 1st-year *Mathematics for Physicists*, ...

SELECTED PUBLIC ENGAGEMENT

- Developed an interactive *'Multiverse Simulator'* outreach project which I demonstrated *2026*
  at the IoA/KICC Open Day (1,000+ attendees) as part of the Cambridge Festival
- Interviewed on *'Unexpected Elements'* from the BBC World Service *2025*
- Contributed to the art/science exhibition *'Cosmic Titans'* at Lakeside Arts, Nottingham *2025*
  Interacted with artist Conrad Shawcross RA to provide input for his piece *'The Blind Proliferation'*; gave an interview exploring the science behind Conrad's work, featured in the exhibition and online

- My research and simulations featured in the documentary *'Do we live in a multiverse?'* *2024*
  Aired on French and German TV and more than 5 million combined views on YouTube
- Led maths outreach activities at a local school as part of the Cambridge NRICH project *2024*
- Invited speaker for the Cambridge Astronomical Association *2024*
- YouTube video interview on *'Early Universe Cosmology in the Lab'* *2023*
- Outreach talk for alumni of UCL's 'Introduction to Astronomy' course *2023*
- Participated in five interviews for media pieces on my paper *2022*
  'Bridging the μHz gap in the gravitational-wave landscape with binary resonance'
- Maths and physics tutor at Open Tutors London *2017–2020*
  Co-initiated tutoring programme for University of London students from under-represented groups
- Ran an interactive exhibit on Dark Matter at Science Gallery London *2019*

SOFTWARE AND NUMERICS

- Author of Fortran lattice field theory code `lattice-fvd` and Python code `gw-resonance`
- Experience with advanced numerical methods including, e.g., Fourier and Chebyshev pseudospectral methods and symplectic integration
- Extensive experience in Unix environments (Ubuntu/MacOS), including in HPC settings; extensive Python experience (object-oriented programming; data handling and visualisation; `JAX`, `Jupyter`, `NumPy`, `SciPy`, `h5py`, `Astropy`, `healpy`, `sympy`, . . .); other languages and software include Fortran, C++, Mathematica, Git, MATLAB, SageMath, SQL, LaTeX (including Ti*k*Z), . . .

PUBLICATIONS

Citation statistics as of 22 July 2026 (data from INSPIRE-HEP):

Lead-author only	18 papers, 821 citations, h-index = 13
Short author list only	32 papers, 1,667 citations, h-index = 18
All papers (inc. LIGO)	115 papers, 44,457 citations, h-index = 72

Lead-author papers (author list is ordered alphabetically in some cases)

L1. **ACJ**, D. Blas, and J. W. Foster
Unveiling the Microhertz Gravitational-Wave Sky with the Square Kilometre Array Observatory
Advancing Astrophysics with the SKA II (2026) | arXiv:2606.27418 [astro-ph.CO]

L2. **ACJ**, H. V. Peiris, and A. Pontzen
Bubbles in a box: Eliminating edge nucleation in cold-atom simulators of vacuum decay
Phys. Rev. A **112** (2025), 023318 | arXiv:2504.02829 [cond-mat.quant-gas]

L3. **ACJ**, I. G. Moss, T. P. Billam, Z. Hadzibabic, H. V. Peiris, and A. Pontzen
Generalized cold-atom analogues for vacuum decay
Phys. Rev. A **110** (2024), L031301 | arXiv:2311.02156 [cond-mat.quant-gas] | Letter

L4. **ACJ**, J. Braden, H. V. Peiris, A. Pontzen, M. C. Johnson, and S. Weinfurtner
Analog vacuum decay from vacuum initial conditions
Phys. Rev. D **109** (2024), 023506 | arXiv:2307.02549 [cond-mat.quant-gas] | Editor's Suggestion

L5. A. K.-W. Chung, **ACJ**, J. D. Romano, and M. Sakellariadou
Targeted search for the kinematic dipole of the gravitational-wave background
Phys. Rev. D **106** (2022), 082005 | arXiv:2208.01330 [gr-qc]

L6. M. R. Mosbech, **ACJ**, S. Bose, C. Boehm, M. Sakellariadou, and Y. Y. Y. Wong
Gravitational-wave event rates as a new probe for dark matter microphysics
Phys. Rev. D **108** (2023), 043512 | arXiv:2207.14126 [astro-ph.CO]
Co-lead author with Markus Mosbech; I developed the core idea and led $\sim 50\%$ of the analysis
Featured in a Royal Astronomical Society press release at the 2023 National Astronomy Meeting

L7. D. Blas and **ACJ**,
Bridging the μHz gap in the gravitational-wave landscape with binary resonance
Phys. Rev. Lett. **128** (2022), 101103 | arXiv:2107.04601 [astro-ph.CO]
Awarded a Buchalter Cosmology Prize (2nd Prize), citing its 'potential for remarkable impact'
Altmetric attention score of 382, in the top 0.3% of all papers tracked by Altmetric
Featured in the *Daily Express*, *Physics* magazine, *Big Think*, *SYFY wire*, and 40+ other publications

L8. D. Blas and **ACJ**
Detecting stochastic gravitational waves with binary resonance
Phys. Rev. D **105** (2022), 064021 | arXiv:2107.04063 [gr-qc]

L9. **ACJ** and M. Sakellariadou
Nonlinear gravitational-wave memory from cusps and kinks on cosmic strings
Class. Quant. Grav. **38** (2021), 165004 | arXiv:2102.12487 [gr-qc]
Invited submission to CQG as winner of the Best Student Talk Prize at BritGrav 21

L10. **ACJ** and M. Sakellariadou
Primordial black holes from cusp collapse on cosmic strings
arXiv:2006.16249 [astro-ph.CO]

L11. **ACJ**, J. D. Romano, and M. Sakellariadou
Estimating the angular power spectrum of the gravitational-wave background in the presence of shot noise | Phys. Rev. D **100** (2019), 083501 | arXiv:1907.06642 [astro-ph.CO]

L12. **ACJ** and M. Sakellariadou
Shot noise in the astrophysical gravitational-wave background
Phys. Rev. D **100** (2019), 063508 | arXiv:1902.07719 [astro-ph.CO]

L13. **ACJ**, R. O'Shaughnessy, M. Sakellariadou, and D. Wysocki
Anisotropies in the astrophysical gravitational-wave background: The impact of black hole distributions | Phys. Rev. Lett. **122** (2019), 111101 | arXiv:1810.13435 [astro-ph.CO]

L14. **ACJ**, A. G. A. Pithis, and M. Sakellariadou
Can we detect quantum gravity with compact binary inspirals?
Phys. Rev. D **98** (2018), 104032 | arXiv:1809.06275 [gr-qc]

L15. **ACJ**, M. Sakellariadou, T. Regimbau, and E. Slezak
Anisotropies in the astrophysical gravitational-wave background: Predictions for the detection of compact binaries by LIGO and Virgo
Phys. Rev. D **98** (2018), 063501 | arXiv:1806.01718 [astro-ph.CO]

L16. **ACJ** and M. Sakellariadou
Anisotropies in the stochastic gravitational-wave background: Formalism and the cosmic string case
Phys. Rev. D **98** (2018), 063509 | arXiv:1802.06046 [astro-ph.CO]
Featured in PRD's 'kaleidoscope' for Sep 2018

Other selected papers (with summary of my contributions)

O1. E. Hertig, **ACJ**, H. V. Peiris, A. Pontzen, and M. C. Johnson
Evidence for renormalized instantons in real-time simulations of vacuum decay
Submitted to Phys. Rev. Lett. | arXiv:2607.06680 [hep-th]
Reconciled long-standing discrepancy between Euclidean and real-time treatments of vacuum decay using my code `lattice-fvd`; significant methodological and conceptual contributions throughout; informal supervision of PhD student (Emilie Hertig, now a postdoc in Cambridge)

O2. Y. Zhang, F. Wang, P. Wong, **ACJ**, K. Konstantinou, J. Thywissen, C. Eigen, and Z. Hadzibabic
Quantum Simulation of Massive Relativistic Fields in 2+1 Dimensions
Under review in Nature | arXiv:2603.08840 [cond-mat.quant-gas]
First experimental realisation of relativistic 2+1D Sine-Gordon model, enabled by my earlier work demonstrating its viability [L3]; significant contributions to theory, conceptualisation, and experimental design throughout the project

O3. J. W. Foster, D. Blas, A. Bourgoin, A. Hees, M. Herrero-Valea, **ACJ**, and X. Xue
Prospects for gravitational wave and ultra-light dark matter detection with binary resonances beyond the secular approximation | Under review in Phys. Rev. D | arXiv:2504.16988 [gr-qc]
Significant conceptual and methodological contributions throughout project

O4. J. W. Foster, D. Blas, A. Bourgoin, A. Hees, M. Herrero-Valea, **ACJ**, and X. Xue
Discovering μHz gravitational waves and ultra-light dark matter with binary resonances
Under review in Phys. Rev. Lett. | arXiv:2504.15334 [astro-ph.CO]
Significant conceptual and methodological contributions throughout project

O5. A. Abac *et al.* (inc. **ACJ**)
The Science of the Einstein Telescope
JCAP **03** (2026), 081 | arXiv:2503.12263 [gr-qc]
Coordinated and led writing of section on cosmic strings for the Einstein Telescope 'Blue Book', defining the science case for a next-generation ground-based gravitational-wave detector

O6. L. Zwick, D. Soyuer, D. J. D'Orazio, D. O'Neill, A. Derdzinski, P. Saha, D. Blas, **ACJ**, L. Z. Kelley
Bridging the micro-Hz gravitational wave gap via Doppler tracking with the Uranus Orbiter and Probe Mission: Massive black hole binaries, early universe signals and ultra-light dark matter
Phys. Rev. D **112** (2025), 083029 | arXiv:2406.02306 [astro-ph.HE]
Led analysis of stochastic gravitational-wave signals and implications for early-Universe physics, wrote corresponding sections of paper

O7. N. Kouvatsos, **ACJ**, A. I. Renzini, J. D. Romano, M. Sakellariadou
Unbiased estimation of gravitational-wave anisotropies from noisy data
Phys. Rev. D **109** (2024), 103535 | arXiv:2312.09110 [astro-ph.CO]
Proposed and led theoretical work on new analysis method that has since been adopted by the LVK; informal supervision of PhD student (Nick Kouvatsos)

O8. M. Branchesi *et al.* (inc. **ACJ**)
Science with the Einstein Telescope: a comparison of different designs
JCAP **07** (2023), 068 | arXiv:2303.15923 [gr-qc]
Co-led stochastic background sensitivity analysis for different Einstein Telescope configurations, guiding further development of the proposal

O9. S. Gasparrotto, R. Vicente, D. Blas, **ACJ**, and E. Barausse
Can gravitational-wave memory help constrain binary black-hole parameters? A LISA case study
Phys. Rev. D **107** (2023), 124033 | arXiv:2301.13228 [gr-qc]
Significant conceptual and methodological contributions; informal supervision of PhD student (Silvia Gasparrotto, now a fellow at CERN-TH)

O10. P. Auclair *et al.* (inc. **ACJ**; LISA Cosmology Working Group)
Cosmology with the Laser Interferometer Space Antenna
Living Rev. Rel. **26** (2022), 5 | arXiv:2204.05434 [astro-ph.CO]
LISA white paper; contributed to section on cosmic strings, led analysis of related GW anisotropies

O11. A. I. Renzini, B. Goncharov, **ACJ**, and P. M. Meyers
Stochastic Gravitational-Wave Backgrounds: Current Detection Efforts and Future Prospects
Galaxies **10** (2022), 34 | arXiv:2202.00178 [gr-qc]
Invited review article; major contributions to sections on gravitational-wave theory and sources

O12. N. Bartolo *et al.* (inc. **ACJ**; LISA Cosmology Working Group)
Probing Anisotropies of the Stochastic Gravitational Wave Background with LISA
JCAP **11** (2022), 009 | arXiv:2201.08782 [astro-ph.CO]
LISA review paper; coordinator for 'topological defects' section, with further contributions to 'astrophysical sources' section

O13. P. Auclair, J. J. Blanco-Pillado, D. G. Figueroa, **ACJ**, M. Lewicki, M. Sakellariadou, S. Sanidas, L. Sousa, D. A. Steer, J. M. Wachter, and S. Kuroyanagi (LISA Cosmology Working Group)
Probing the gravitational wave background from cosmic strings with LISA
JCAP **04** (2019), 034 | arXiv:1909.00819 [astro-ph.CO]
LISA review paper; significant writing contributions throughout

O14. B. P. Abbott *et al.* (inc. **ACJ**; LIGO Scientific Collaboration, Virgo Collaboration)
Directional limits on persistent gravitational waves using data from Advanced LIGO's first two observing runs | Phys. Rev. D **100** (2019), 062001 | arXiv:1903.08844 [gr-qc]
Led interpretation of LIGO/Virgo observational results in the context of cosmological and astrophysical source models, wrote corresponding section

O15. B. P. Abbott *et al.* (inc. **ACJ**; LIGO Scientific Collaboration, Virgo Collaboration)
Search for the isotropic stochastic background using data from Advanced LIGO's second observing run | Phys. Rev. D **100** (2019), 061101 | arXiv:1903.02886 [gr-qc] | Rapid communication
Led analysis and wrote section on implications for cosmic string models

INVITED TALKS

Total of 57 invited talks, including 32 institutional seminars and 25 conference/workshop presentations across 14 countries on 3 continents

1. **New Frontiers in Strong Gravity** — *Jul 2026*
   Benasque, Spain
2. **Cosmological Probes of the Early Universe** — *Jun 2026*
   King's College London
3. **Theory Seminar** — *May 2026*
   DESY, Hamburg
4. **Cosmology Lunch Seminar** — *May 2026*
   DAMTP, University of Cambridge
5. **Cosmology Seminar** — *Apr 2026*
   Queen Mary University of London
6. **British Applied Mathematics Colloquium** — *Mar 2026*
   University of East Anglia, Norwich
7. **Particle Theory and Cosmology Seminar** — *Mar 2026*
   Swansea University

8. **Brout-Englert-Lemaître Seminar** *Feb 2026*
   Brussels
9. **Quantum Light and Matter Seminar** *Nov 2025*
   Durham University
10. **Particle Cosmology Seminar** *Oct 2025*
    Imperial College London
11. **Numerical Simulations of Early Universe Sources of Gravitational Waves** *Aug 2025*
    Nordita, Stockholm
12. **Cosmology Seminar** *Jul 2025*
    CERN, Geneva
13. **Gravitational Wave Probes of Physics Beyond Standard Model** *Jun 2025*
    University of Warsaw
14. **Multiverse from Home** *Jun 2025*
    Online
15. **WE-Heraeus Seminar: New Windows on the Universe** *May 2025*
    Kitzbühel, Austria
16. **QSimFP Community Workshop** *Mar 2025*
    University of Nottingham
17. **Early Universe from Home** *Feb 2025*
    Online
18. **Theoretical Particle Physics Seminar** *Feb 2025*
    University of Sussex
19. **Joint seminar, LMU Cosmology and MPI Quantum Optics** *Jan 2025*
    Ludwig Maximilian University of Munich
20. **General Relativity Seminar** *Dec 2024*
    DAMTP, University of Cambridge
21. **Cosmology Journal Club** *Nov 2024*
    University of Padova (online)
22. **Particle Cosmology Seminar** *Nov 2024*
    University of Nottingham
23. **Cosmology/Extragalactic Seminar** *Oct 2024*
    University College London
24. **Cambridge-LMU Meeting** *Oct 2024*
    Kavli Institute for Cosmology, University of Cambridge
25. **GEMMA2 Workshop** *Sep 2024*
    Sapienza University of Rome
26. **Majorana-Raychaudhuri Seminar** *Sep 2024*
    Kolkata/Salerno (online)
27. **Cold atoms and molecules for fundamental physics** *Jul 2024*
    Cambridge
28. **4th EuCAPT Symposium** *May 2024*
    CERN, Geneva

29. **British Applied Mathematics Colloquium (BAMC)** *Apr 2024*
Newcastle University
30. **Cosmology Lunch Seminar** *Feb 2024*
DAMTP, University of Cambridge
31. **Gravitational-Wave Group Meeting** *Jan 2024*
Institute of Cosmology and Gravitation (ICG), University of Portsmouth
32. **Oberthaler Group Seminar** *Nov 2023*
Kirchhoff Institute for Physics (KIP), Heidelberg
33. **Cosmology from Home** *Jul 2023*
Online
34. **Quantum Simulators for Fundamental Physics Workshop** *Jun 2023*
Perimeter Institute for Theoretical Physics, Waterloo, Canada
35. **Astrophysics Seminar** *May 2023*
University of Leicester
36. **Cosmology Seminar** *May 2023*
Beecroft Institute, Oxford
37. **Theory Group Seminar** *May 2023*
Astroparticle and Cosmology Laboratory (APC), Paris
38. **Cosmology and Relativity Seminar** *Apr 2023*
Queen Mary University of London
39. **London Gravity Meeting** *Mar 2023*
Royal Society, London
40. **'Dark Matters' Workshop** *Nov 2022*
Université Libre de Bruxelles (ULB)
41. **London-Oldenburg Relativity Seminar** *Nov 2022*
University College London/University of Oldenburg (online)
42. **ICTP-AP Seminar** *Sep 2022*
International Centre for Theoretical Physics, Asia-Pacific (online)
43. **Quantum Simulators for Fundamental Physics Workshop** *Sep 2022*
Science Gallery London
44. **'Gravitational-Wave Orchestra' Workshop** *Sep 2022*
Université Catholique de Louvain, Belgium
45. **Theory Group Seminar** *May 2022*
Institute of High-Energy Physics (IFAE), Barcelona
46. **Quantum Technology Seminar** *May 2022*
London Centre for Nanotechnology, University College London
47. **Cosmology/Extragalactic Seminar** *Nov 2021*
University College London
48. **Theory Group Seminar** *Oct 2021*
Astroparticle and Cosmology Laboratory (APC), Paris
49. **Ibarra Group Seminar** *Jul 2021*
Technical University of Munich (online)

50. **Gravitational Wave Probes of Physics Beyond the Standard Model** *Jul 2021*
University of Warsaw (online)

51. **London Cosmology Discussion Meeting (LCDM)** *Dec 2020*
Royal Astronomical Society, London (online)

52. **Theoretical Cosmology Seminar** *May 2020*
Institute of Cosmology and Gravitation (ICG), University of Portsmouth (online)

53. **Cosmology Seminar** *May 2020*
Beecroft Institute, University of Oxford (online)

54. **London Cosmology Discussion Meeting (LCDM)** *Feb 2020*
Royal Astronomical Society, London

55. **Gravitational Wave Probes of Fundamental Physics** *Nov 2019*
EuCAPT workshop, Amsterdam

56. **Seminar** *Feb 2019*
Virtual Institute of Astroparticle Physics (online)

57. **Cosmology Coffee Seminar** *Oct 2018*
Imperial College London
